

GUIDANCE ON SENDING IMAGES AND DOCUMENTS USING WE TRANSFER

Members are encouraged to help to add to the website Gallery pages by taking photos on their smartphones when playing in RAFGS events and sending them to the website by email or file transfer.

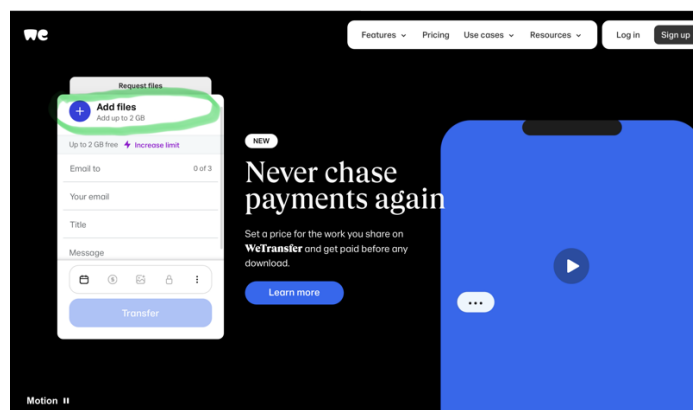

The simplest way of sending images is by email to gallery@rafgs.org.uk, but even smartphone images are often too large to send by email, or you might have to send several emails if you have a number of images to send.

Another easy way of sending large or multiple files is to use WeTransfer <https://wetransfer.com>

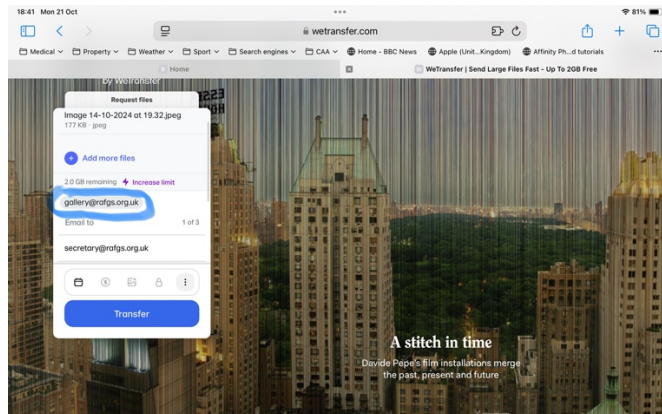

Although there are some advantages to creating a (free) account, this is not necessary – files can be sent from the home screen without having an account:

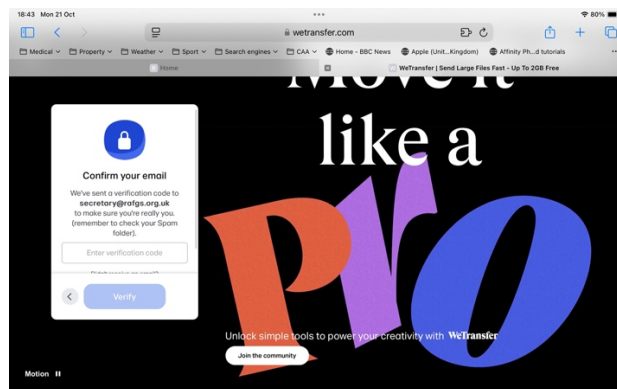

- Add the files you want to send

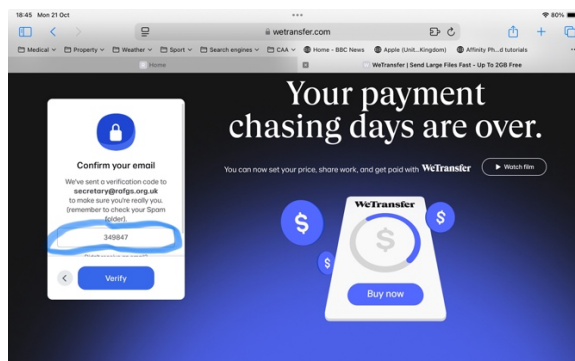

- Add the email address you want to send files to (gallery@rafgs.org.uk) and your own email address as sender

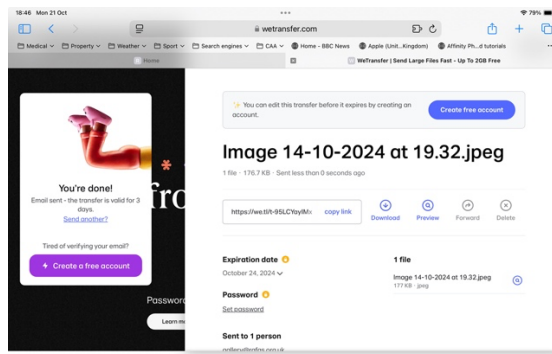

- Select 'Transfer'. If you haven't created an account, the app will send a verification email to the sender email address, with a verification code

- Go to your email inbox, open the verification email (check your junk folder if it is not received) and enter the verification code on WeTransfer

- The file transfer will then complete and you will receive confirmation on the screen and by email

- You will also receive a confirmation email when the files have been received and downloaded.

Smartphone App

WeTransfer is also available as an app for tablet and smartphone (Android and Apple), but this does require you to sign up for an account. However, it has the benefit of enabling you to send the images directly from your phone.
